Header Content

Please Be Advised, the Portal Infrastructure is a complete project to develop a HOST SITE (3PMSidePanel.Design), a site that will always be unseen. Its content will be published/deployed across ALL the Foundations websites in the form of a Widget or Plug-In, or some other connection mechanism so that updates are only done ONCE. This wireframe draft reflects what that structure and format should look like on each of our websites home pages, includes notes and includes a sample deployment of the end result. The <https://3PMSidePanel.Design> Portal is a stand-alone website host that will publish our procurement content..

** WEB PAGE **

Main Body Content

Since each website is different with differing purposes, the layout will be appropriate to the purpose of the website and its visitors.

There will be crossover content & visitors from site to site. Except for background & boarder colors, all else on the homepage shall be identical to this layout.
